

TECHNOL STORAGE TANKS FOR WATER, DRINKING WATER AND WASTE WATER

Water is a source of life, we have to safeguard it!

Storage tanks Technol are produced from reinforced polyester

Why is reinforced polyester a better material?

- **Better mechanical properties than other materials**
- **Certificated for drinking water**
- **Very long lifetime without maintenance**
- **Suitable for vehicle load**

Photo of an underground storage tank

Advantages:

- Custom openings can be produced
- Smooth inner surface, easy for cleaning
- You don't need a concrete base, except for flooding regions
- Long lasting solution, quick installation

Dimensions of standard storage tanks:

Volume in L	Diameter in mm	Length in mm	*Weight in kg
8.000	2.000	2.895	555
10.000	2.000	3.535	625
15.000	2.400	3.740	975
20.000	2.400	4.850	1.175
25.000	2.400	5.960	1.420
30.000	2.400	7.060	1.615
35.000	2.400	8.380	1.820
40.000	2.400	9.270	1.930
45.000	2.400	10.590	2.150
50.000	2.400	11.690	2.400

***Weights are informative**

Trustworthy partner

The beginnings of Technol are from 1989. Today Technol, which has its own R&D and production is active throughout all Europe, Russia, Middle East and Asia. The company works primarily in the sector of water treatment, from swimming pool to industrial waters, waste water and drinking water.

The company Technol works according ISO 9001/14001, TUV WHG and DVS standards.
